

## DISINFORMATION ABOUT THE RUSSIAN-UKRAINIAN WAR: DEBUNKING MYTHS

12.03.2022

### FAKE

Social media is spreading information that the Ukrainian Armed Forces allegedly mined ammonia warehouses in Severodonetsk because they want to blow them up and accuse the so-called "LPR" of provocation. It is noteworthy that this was reported in the "People's Militia of the People's Republic of China".

The iron dome over Russia is the goal of the West. It is through YouTube that Russian state media will be blocked, and Instagram has started to label them.

### REAL

There are no chemicals at the Severodonetsk "Azot" plant: ammonia was completely processed there and the ammonia storage facility was released. "Severodonetsk" Nitrogen "does not pose any danger to residents of the city and region. With the beginning of hostilities at the plant completely stopped production: all key shops stopped, the plant stopped producing fertilizers. Residues of finished products (fertilizers) and chemicals were completely removed from the plant outside Luhansk region.

"The security service and technical service of the plant conducted a full additional inspection of all production facilities and warehouses of the company for the presence of hazardous chemicals - such substances are absent in the company," - said in a statement.

This fake was also refuted by the Center for Counteracting Disinformation at the National Security and Defense Council of Ukraine. And they warned that the occupiers could prepare sabotage at the enterprise.

The West largely limited Russia, but Russia lowered the iron dome over itself. Roskomnadzor has restricted access to Facebook and Twitter, and will close Instagram on March 14. The decision on Instagram will cut off 80 million users in Russia from the global network.

## DISINFORMATION ABOUT THE RUSSIAN-UKRAINIAN WAR: DEBUNKING MYTHS

12.03.2022

### FAKE

A network of 30 biolaboratories in Ukraine has been working to enhance the pathogenic properties of dangerous diseases.

NATO has turned the civil conflict into a full-scale Western war against Russia.

Zuckerberg is Hitler of the 21st century because Meta has allowed calls to assassinate Russians and Belarusians.

### REAL

The Ministry of Foreign Affairs and the Ministry of Health of Ukraine stated that there were no such laboratories and called the allegations about them misinformation. Earlier, White House spokeswoman Jane Psaki called Russia's allegations of alleged developments in Ukraine absurd.

By the way, scientists have already explained that it is impossible to create, according to the Russian version, "biological weapons that will affect only a certain ethnic group." And most of the "dangerous" pathogens and bacteria in Ukrainian laboratories are common microorganisms.

There has never been a civil conflict in Ukraine. **In 2014, Russia attacked Ukraine and occupied part of our territories.**

On February 24, 2022, Russia launched a full-scale war against Ukraine.

Meta will indeed allow Facebook and Instagram users to call for violence against Russians and Russian soldiers in the context of their invasion of Ukraine.

The company further explained that permission to use such appeals will apply only to users from Ukraine. In addition, the company explains these are measures that allow people to use their words for self-defense in war.

## DISINFORMATION ABOUT THE RUSSIAN-UKRAINIAN WAR: DEBUNKING MYTHS

12.03.2022

### FAKE

Russia, through its agents in Kherson, spreads false messages that are beneficial to Russia among the citizens, which discredit the actions of the Ukrainian authorities: "Kherson is abandoned"; "Ukraine does not need Kherson"; "Ukraine has left the civilian population without means of subsistence" and so on.

Ukraine refuses to repair power lines at the Chornobyl nuclear power plant.

The Russian military in the Chernihiv region shares a dry ration with the civilian population.

Zelenskyy is lying that he is sending rubber convoys to Mariupol, because the local people have not received any humanitarian aid.

### REAL

This is not the case at all. Ukraine will never leave the people of Kherson in trouble. Taking into account the situation at the front, it would be reckless of the Ukrainian army to start fighting within the city sacrificing civilians. Ukraine appreciates the efforts of the local population, which, despite the temporary occupation of Russia, goes to rallies in support of Ukraine.

According to StopFake, Ukraine is ready to start repairs at the Chornobyl nuclear power plant at any moment, but **Russia is preventing it.** IAEA and European Nuclear Safety Regulators Group call on Russia to immediately restore Ukraine's control over all nuclear facilities.

Today, the **Russian invaders destroyed the "Ukraine" Hotel** in Chernihiv. In addition, **missile strikes on civilian infrastructure, including aviation, continue in the city. Chernihiv was left without electricity, gas, water and heating in the morning**, but city services are repairing it.

Today the humanitarian corridors to Mariupol are active. However, it is the **Russian invaders who do not allow civilians to pass through and leave or let the supplies enter the city.**
